MINIBABY SHOES

This is the first sneaker printer on the market. This machine allows the direct printing of objects on the shoes without any treatment, with great durability and a very low cost.

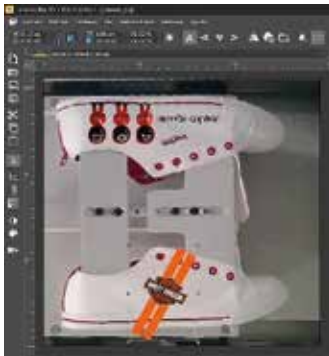

With the Minibaby Shoes it is possible to personalise all types of footwear with highly adherent and flexible inks, overcoming unevenness thanks to the exclusive HS technology of Imprimo.

CHARACTERISTICS

-  CCP System and HS Technology
-  3-5 minutes of printing time
-  RIP Imprimo

-  8cm thickness
-  1400x1200 dpi
-  45x50cm

The Minibaby Shoes stands out from other printers thanks to its real-time CCP (Camera Position Control) system, which allows you to see the location of the image and the print at all times in real time. At the same time, it also comes with HS Technology that allows printing on unevenness of up to 2cm, two exclusive Imprimo technologies that revolutionise the personalisation of shoes.

Super

HOLDER

The new design of our printer includes increased height and a new shoe mount that potentially improves printing accuracy and results.

EXAMPLES

SPECIFICATIONS

Printing area	45x50cm
Printing thickness	8cm
Print heads	4 print heads piezoelectric variable-drop
Colors	CMYK + white+ varnish
Ink type	UV LED with high adhesion and flexibility
Lamps	Air-cooled
Technologies	HS Technology and CCP System
Print technology	Micro-piece on demand UV LED
RIP Software	Included
PC	Included
Resolution	1400x1200 dpi
Feeding	50/60hz 220v (10%)>14amp
Weight	400kg
Security	CE Certification
Measures	150x80x128cm
