## Technical Characteristics

Easy to operate, smart and user-friendly. Brand servo motor, low noise, fast speed. Professional integrated circuits, common engraving languages, supporting various popular software in the market. High-definition camera automatic contour cutting, multi-point positioning. All-in-one pressure roller linkage to ensure that the machine's paper feeding accuracy is 10 meters without deviation. Scan QR code to identify USB flash disk files. Automatic suction platform system, higher scanning accuracy.

## Technical Specifications

Model	GH1660
Max. material width	1660mm
Max. cutting width	1540mm
Pinch roller	8
Main board	ARMS mainboard
Carriage	Aluminum casting carriage with camera
Contour cutting type	Auto contour
Cutting precision	±0.02mm
Feeding accuracy	7m
Drive motor	Servo motor
Stand	Stand with basket
Speed	1200m
Force	800g
Roller	Grit
Interface	USB+U DISK+TCP
Software	Jinkacut(pro)/Signmaster(Pro)/Sign cutroller
Command	HPGL
Input voltage	100-120V/220-240V
Packing size	1950*350*425mm
G.W.	42kg
