Technical Characteristics

Auto water cooling platform combines with environmental LED cold solidified technology, ensuring fine printing on heat sensitive media without deformation. Printer is designed for industrial purpose and assembled with four rubber rollers feeding system, heavy duty body for longer life and stability. Enhanced structure is equipped with double THK guide rail, magnetic levitation motor system for high precision printing. Efficient up-down tension system guarantee media feeding without winkle. Strong take up system can fit media rolls more than 200kgs.

Technical Specifications

Model	FR3300UV	
Print head	Print head	KM1024i head
	QTY	4~18pcs
Ink	Color	C/M/Y/K/LC/LM/W
	Ink type	
	Ink supply	
Speed	Production mode	86 m ² /h ~ 90 m ² /h
	Quality mode	68 m ² /h ~ 72 m ² /h
	Photo mode	46 m ² /h ~ 50 m ² /h
Media	Dimension	3200mm
	Media type	Soft film lightbox, light cloth, PVC banner, car stickers, textile fabrics and other printed materials
	Media transfer	Roller feeding
Cleaning	Positive pressure cleaning device	
Rip software	Printfactory, Caldera, Onyx, SAI	
Curing system	UV LED Lamp	
File Format	Tiff, Jpeg, Postscript,Eps, Pdf	
Interface	USB	
Working Environment	Temperature: 18°C - 30°C, Humidity : 30%-80%	
Power Supply	Frequency: 50HZ/60HZ Rated voltage: AC220V (±10%)	
Machine size	L5500 × W1600 × H2000 (mm)	
Machine Weight	4550Kg	
Warranty	1 year
