

GD6800EUV High Speed Multilayer Industrial Printer (I3200x6)

3-layer printing technology for color conversion

The unique color + white + color printing mode provides consistent color performance with or without lighting. It works as alternative solution for double-sided printing and is suitable for light box applications with fine details

- High efficiency UV LED technology;
- Add a water-cooled constant temperature platform to ensure that the output screen is not wrinkled;
- International standard UV ink, alternative to weak solvent market, environmentally friendly and odorless;
- Industrial grade rack design, simple operation, stable output;
- Small volume and large production, saving office space, and strong productivity;
- Equipped with Antistatic device: make the printing picture more accurate.

Configured with Six i3200 printheads, 3.5pl ultra-small ink droplets

CMYK+W+CMYK

One machine with multiple uses, different color modes matching application solutions to meet the needs of different customers, can replace some high-end weak solvent machine markets, efficient and environmentally friendly!

Widely used in various materials: lamps, transparent films, car stickers, wallpaper, wall coverings, silk canvas and other advertising decoration materials.
